FIRS INTERNATIONAL WORKSHOP ARTISTIC - ROLLART

To all the Federations,

FIRS, from the **17th to 21st of January 2018** will organize an International Seminar for ARTISTIC in Rome, Italy. It will be open to all, and in particular, to trainers, judges and to technical specialists for Rollart.

GOAL

The goal of the seminar is to give instruments and knowledge to better understand judging criteria that will be adopted in the near future with the new judging system Rollart. For this reason, there will be classes on all the disciplines involved in this big change at the moment (free skating, dance, pairs and precision) and they will be analyzed by different point of views: trainers, judges and specialists.

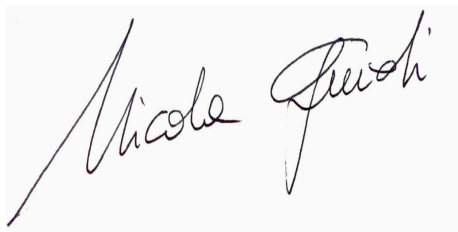

During the seminar we will talk about the organization of FIRS Seminars for continents and the new technical organization of the Artistic Skating World. We will give precise information on the new way we are going to create and manage FIRS Official Trainers.

The participation of trainers is propaedeutic to the future formation of FIRS Official Trainers.

At the end it will take place the first exam for Rollart technical specialist/controller for free skating and pairs (dance and precision to be confirmed).

In few weeks, FIRS will send detailed information about the seminar: schedule, hotels, transportation, entry fee. Please **SAVE THE DATE!**

FIRS ATC-Chairman
Nicola Genchi
