## 100M

The 100M route will be located in Passeig de Gràcia, it will go from Provenza to Rosellón. The route will have a slope of approximately 1% upward.

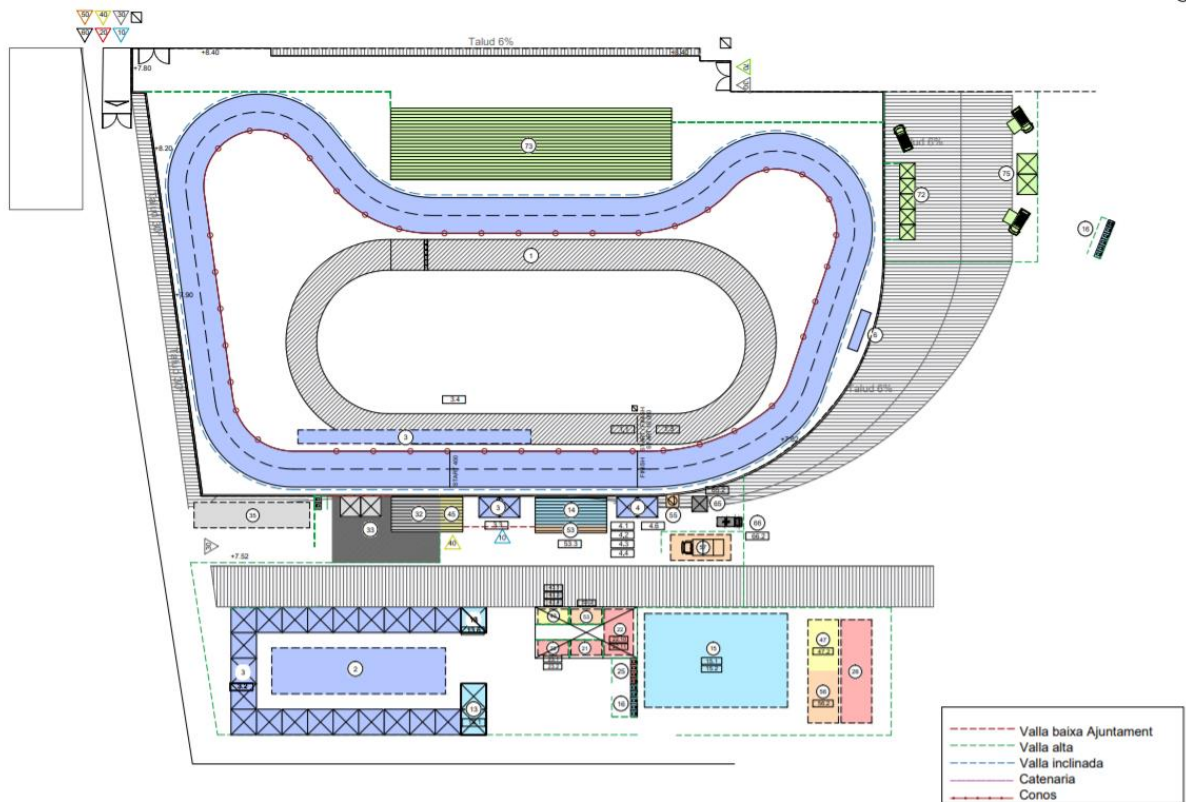

Please find below the layout:

## TRACK AND ROAD CIRCUIT

- The **Track** will be 200 mt long and 6 mt wide with a constant track profile (linear profile) and 95 cm height cant. Please see below the layout, marked in grey.
- The location of the **Road Circuit** has changed due to a number of challenges faced by the Local Organizing Committee. It will no longer be located in Av Maria Cristina but at Front Marítim, around the track.

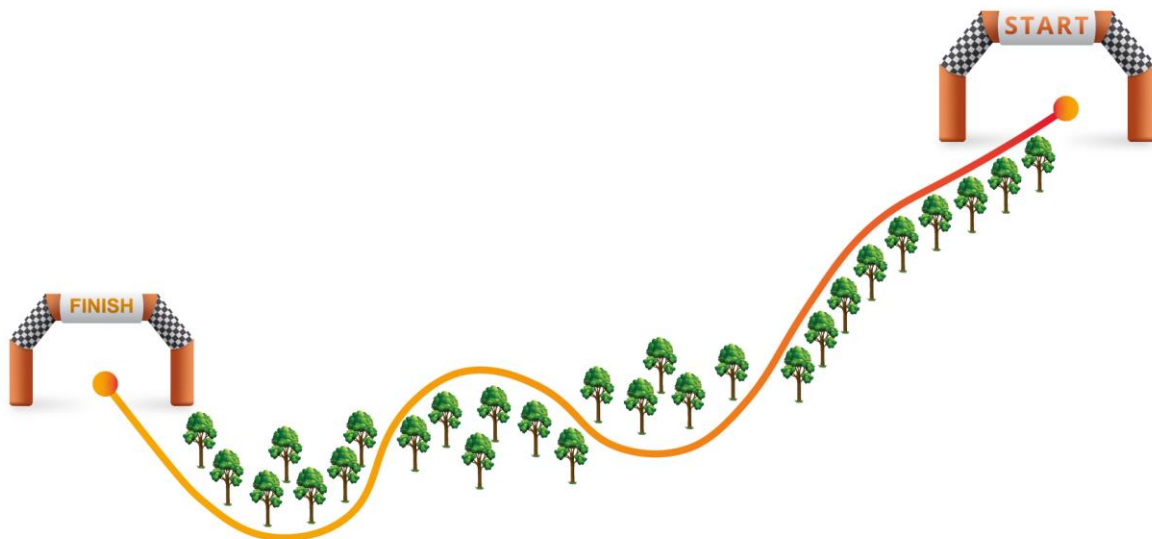

The Road Circuit will be 340 mt long and 7 mt wide.  
Please see below the layout marked in blue:

## DOWNHILL

The The circuit for Inline Downhill, Skateboarding Downhill and Street Luge has been modified due to a number of challenges faced by the Local Organizing Committee. It will still be located in the historic mountain of Montjuïc but the circuit will be 850 mts long (0.52 miles) with an average grade 8.1% and the steepest point of 10.15%. Please see the map below:

It will be a circuit of medium difficulty with constant acceleration.

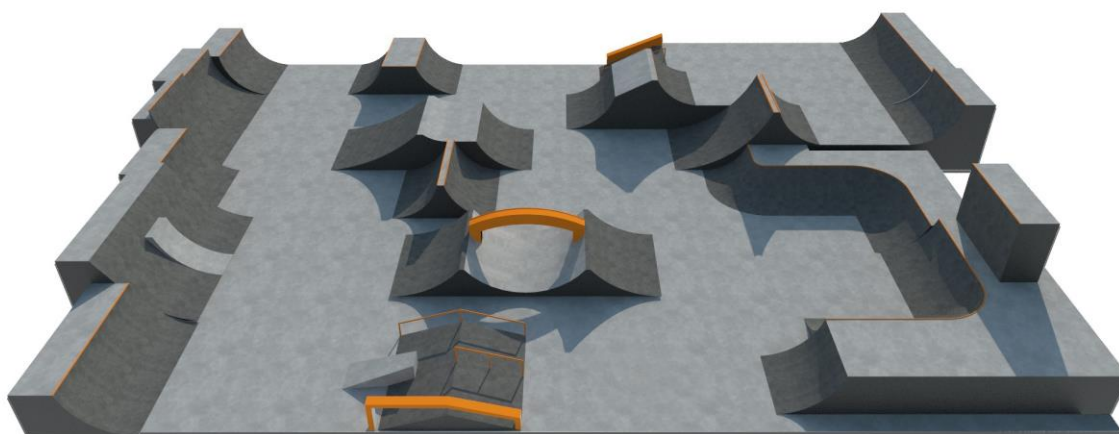

The top speed is around 80 km/h and all the necessary security measures along the track will be applied.

In addition, the lift back to the start area will use a secondary route to guarantee the total absence of traffic within the circuit during the event. By doing this, the process of bringing the riders to the top will be faster.
